

Help Me Protect Women's Health Services Rights

Dear Friends,

Hoag Memorial Hospital Presbyterian needs your help. We have an important opportunity to improve health services for women.

Ever since Hoag affiliated with Providence St. Joseph, a large Catholic healthcare system, restrictions have been placed on women's health services, and other services such as those around the end of life.

Hoag doctors have complained about difficulty in getting authorizations when prescribing IUD's and other contraceptive and obstetric services, and efforts to steer their decisions about care that are not always aligned with Hoag's best practices.

Constraints such as these have led Hoag to seek to end its affiliation with Providence St. Joseph's.

Attorney General Xavier Becerra and his office have an important role in this decision. He and his staff have heard from Hoag doctors. Now they need to hear from the community about the need for an independent Hoag that can make decisions locally in Orange County without being subject to religious constraints of a large out-of-state health system.

I am writing to ask if you could please take a minute to send a letter of support to the Attorney General's office. It is very simple to do this.

Click on the link below to review the letter, add your own optional personal comments and then send.

Thank you for considering this important request to protect health services for everyone.
